

PAR  **FIT**™
Fits everything.

The complete interchange elements package

aerospace
climate control
electromechanical
filtration
fluid & gas handling
hydraulics
pneumatics
process control
sealing & shielding

ENGINEERING YOUR SUCCESS.

Outstanding coverage and performance. **PAR*♦*FIT™ fits everything.**

Whatever the sector or application, there's a Par Fit solution that fits the job; quickly, efficiently and affordably. In fact, with over 50,000 interchange filter elements, covering almost every main OE part, and with the quality assurance that comes as standard with Parker engineering, Par Fit fits every customer need for specification, reliability, availability and price.

Every part and application

The Par Fit range runs to over 50,000 individual parts, designed to meet the needs of a huge variety of equipment, including hydraulic and lubrication as well as marine applications. Every part is engineered to be fully interchangeable with the original, and specified to perform to equivalent or superior standard.

Every competitor

With Par Fit, you can source replacements for every recognised manufacturer, quickly and easily, all from one guaranteed source.

- ✓ Hydac
- ✓ Eaton (Internormen)
- ✓ Bosch Rexroth (Eppensteiner)
- ✓ Donaldson
- ✓ Pall
- ✓ Mahle
- ✓ Argo
- ✓ MP Filtri

Every sector

Par Fit interchange filter elements are available for applications in virtually every industrial sector. Specified and manufactured with Parker expertise, you can be confident that they will perform wherever they operate - off-highway, bus and truck, agriculture and forestry, materials handling and the military.

Every quality standard

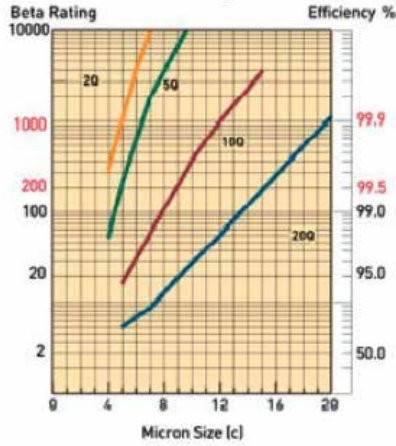

Par Fit elements are produced to the same high quality as Parker originals, conforming to the latest ISO standards for manufacture and testing and using high performance multi-layer media packs. It means that every customer can be 100% confident that with Par Fit, they'll have a replacement part that keeps their application running smoothly.

Everywhere, everyday

Parker's global coverage and international distribution network means that most Par Fit parts are available for immediate despatch. Together with our easy to use, online product selectors and part finders, it means that it's never been easier to access replacement interchange elements anywhere in the world, 365 days a year.

Every budget

Par Fit customers can be sure of a product that meets or even improves on other OE element quality but at a competitive price – often representing a significant cost saving on the original. And because it's Parker, you know that it will be manufactured to the highest standards, using the best materials. There's no compromise - performance and affordability are delivered together.

Quantumfiber – Quality Assured from Parker

The latest of our media lines, these elements have the highest capacity and efficiency available.

Building on decades of expertise, and constant investment in research and development, Quantumfiber is designed to be used exclusively in Parker’s fluid filter products, to deliver optimum performance and reliability.

Quantumfiber is the latest development in contamination control media. A graded multi-layer glasspack, it offers unrivalled dirt holding capacity, meeting industry standard Beta 200 efficiency rating, and readily matching OE filters for operational performance within the application.

Degree of filtration

The ISO 4572 standard previously required only Bx>75 value. That standard has now been upgraded and replaced by ISO16889, reporting the B value of 2, 10, 75, 100, 200 and 1000 for each filter medium or pleat pack.

Corresponding efficiencies for Quantumfiber:

B-value	2	10	75	100	200	1000
Efficiency	50.00%	90.00%	98.67%	99.00%	99.50%	99.99%

Quantumfiber - fluid cleanliness levels

As can be seen in the table, Quantumfiber filter media provides oil cleanliness levels required for the most sensitive hydraulic valves. For a servo valve, the required ISO code is 16/14/11 Parker’s Quantumfiber media provides ISO code of 16/14/10 as a minimum.

Media	Degree of filtration	Upper range	Lower range
Q3	2	16/14/10	13/11/8
Q3	5	18/16/13	17/15/9
Q3	10	20/18/15	19/17/12
Q3	20	22/20/17	21/19/13

Recommended fluid cleanliness levels

A common practice in the industry is for component manufacturers to provide required fluid cleanliness levels for the optimum functioning of products.

Indication of recommended fluid cleanliness levels:

Components	ISO Code
Servo control valves	16/14/11
Proportional valves	17/15/12
Valve & piston pumps/motors	18/16/13
Directional & pressure control valves	18/16/13
Gear pumps/motors	19/17/14
Flow control valves	20/18/15
Cylinders	20/18/15

PAR-FIT™ is much more than a product range. It's a complete solution.

Introducing the Par Fit ToolKit. It changes everything.

We've created a range of software support tools and online resources to make the whole process of identifying, specifying and ordering replacement interchange filter elements quicker and more straight forward for distributors and end-customers alike.

Parker's Hydraulic Filter Division Europe is pleased to present the Par Fit Tool Kit – a new, specially developed software package comprising three individual part identification programmes.

Allowing easy identification of replacement part numbers for a wide range of vehicles and applications, automatic data updates and an ability to enquire about specific part numbers, the Par Fit Tool Kit is Parker innovation at its best.

Now with full product technical data!

The Par Fit toolkit has been improved with the addition of product datasheets providing:

- Product data, CGI's and measurements – at your fingertips!
- Find and specify virtually any replacement part number; within a few seconds
- Search by part number, by equipment or application or by visual reference
- Offline or online – respond to customer queries, quickly and confidently, wherever you are in the world

**To download and register
the Par Fit Tool Kit visit:
www.parkerhfde.com/toolkit**

The **PAR♦FIT™** ToolKit – 3 replacement part identification tools in one complete software solution.

PAR♦FIT™ INTERCHANGE ELEMENT SELECTOR

If you know the manufacturer part number then use our reliable Element Selector to identify the correct corresponding Par Fit part number.

PAR♦FIT™ ELEMENT EXPERT

Do you have the original element but need to source the correct replacement? Three simple steps to identifying the correct Par Fit replacement element.

The Hydraulic Filter

Find the correct Par Fit part number by vehicle type or make or model. Plus so much more information.

Additional resources from Parker HFDE

Parker's dedication to providing support for distributors, sales companies and end-customers alike is demonstrated through its online resources.

Hydraulic & Lube Filtration On & Offline Filter Selector

Visit www.filterselector.com and register today for the HFDE hydraulic and lube filter selector. There is also a downloadable, offline version to install and use when there is no internet connection available.

E-Learning – Parker online knowledge at your fingertips

HFDE's online 'E:Learning' training modules at www.parkerhfde.com/elearning is the first place to go for anyone searching for web-based hydraulic filtration training and personal development.

Condition Monitoring iOS App

Parker HFDE's ConMon app features two unique programs that will enable users to measure the degree of filtration required for their systems, and the frequency at which fluids should be tested, via their iPhone, iPad or iTouch.

Hydraulic and Lubrication Interchange Elements

To further help you in your search for quality Par Fit elements, we have included the list of part numbers that are, today, immediately available and on the shelf in Parker's European Distribution Centre and can be identified and ordered for a fast delivery.
